SYSTEMS ADMINISTRATOR

Catapult Resources West is seeking a software oriented Systems Administrator for this direct hire position in downtown Denver. It is an excellent role for a Sys Admin who enjoys having diverse responsibilities while delivering high availability solutions in a progressive firm. This position works in concert with the Systems Administrator team, desktop support, and IT Manager to monitor, maintain, and improve the firm's IT infrastructure

Position Details:

The Systems Administrator is responsible for provisioning, installation/configuration, operation, and maintenance of systems hardware and software related infrastructure. They will be expected to research and recommend leading edge solutions for systems administration tasks. They will take an active role in document management, and serve in a desktop support capacity.

Experience Profile:

-Experience working in an environment having at least 400 users

-Ability to learn and support multiple software solutions

-Software packaging and deployment expertise

-Excellent troubleshooting skills

-Excellent oral and written communications expertise

-MCSE and/or industry certifications

-Legendary document management systems know-how

Preferred/Helpful:

-5-7 years Systems Administration experience with progressively more responsibilities

-Bachelor's Degree or equivalent experience

-High level experience with the following Microsoft technologies:

>   Windows OS (XP, 7, Server 2003 and 2008)
>
>   Office; Antivirus and malware solutions
>
>   SQL
>
>   Exchange
>
>   Windows Server Update Services
>
>   Active Directory
>
>   Lync
>
>   Group Policy
>
>   Internet Information Services

Additional background in:

-VMware and Hyper-V virtualization

-Storage Area Networks and Network Attached Storage

-Effective Firewall set up and maintenance

-Routing, switching, VLAN, and WAN optimization devices

-Remote access technologies

-VoIP

-Monitoring and alerting software
